

Candidate Handbook Page

This page outlines what hiring looks like at GitLab. We share the latest information about our processes and practices to ensure you have the information you need to feel confident during the interview process.

The GitLab Candidate Handbook is a space for recent applicants and candidates progressing through the interview process. We encourage every prospective job seeker to spend time learning more about the work we do, our culture & values, and what to expect during our hiring process.

The goal of curating these resources is to outline what hiring looks like at GitLab. We share the latest information about our processes and practices to ensure you have the information you need to feel confident during the interview process. The resources referenced here offer guidance on what to expect during each step of the interview process, where we hire, best practices for virtual interviewing, and other useful information.

Interview Stages

The interview process consists of the following stages:

1. Application Process
2. Screening Call
3. Assessment (required for certain roles)
4. Technical Interview (required for certain roles)
5. Team Interviews
6. References & TMRG Connection
7. Offer & Background Screening

Application Process

How to submit an application

► Internal applicants

Who can apply?

► Equal Opportunity Employer

I applied for a job on your careers page. What's next?

Thanks for your interest in GitLab! Our team will reach out if they need more information from you. In the meantime, read about what you can expect during the interview process below.

If your experience is a good fit for the role, we will be in touch soon. Please note that it's not possible for us to respond to every candidate, but we aim to review every application.

A recruiter reached out. How do I know they're real?

Scammers often target job seekers by impersonating companies like GitLab, using the GitLab name and GitLab team member names. Scammers have been observed requesting job seekers pay thousands of dollars for "technology equipment" after job seekers completed an in-depth, fake job application interview process.

Check out the ["What to know about a fake job scam impersonating GitLab"](#) blog post for warning signs and tips on how to protect yourself.

Screening Call

Screening Call expectations

If it is determined that you qualify for continued consideration, the assigned Recruiter will conduct a screening call with you. Calls can last anywhere between 30 and 40 minutes (some specialist roles require more time), depending on the conversation. The Recruiter will wait 5 minutes for you to show up to the appointed video call, which is always shared via email. If you do not show up to the interview, or do not reach out in advance to reschedule, you will be classified as a no show and be disqualified. We will unreject when circumstances beyond your control cause you to miss a scheduled call.

You, the recruiter or the hiring manager can terminate the discussion at any point during the interview if either party determines that it isn't a fit. Be as transparent and honest as possible

and provide feedback.

Depending on the outcome of the call, the talent acquisition team or manager may either reject or move you to the Team Interview stage.

Team Interviews

Team Interviews expectations

After the Screening Call, a candidate will move into the Team Interviews stage if the Recruiter decides that the candidate is fit for the role. Team Interviews may consist of behavioral, panel and/or [technical interviews](#) (certain positions).

Feel free to ask your Recruiter which type of interview you can expect.

Optional TMRG Connection

During the [reference](#) stage in the interview process, candidates will get the option to speak with a GitLab team member who is a member of our [Team Member Resource Groups](#) (TMRGs) to learn about what it's like working at GitLab from someone who they can relate to.

When you receive a reference form, you will have the option to opt-in for a conversation with a member of the [TMRG](#) of your choice. Our Candidate Experience team (CES) will then reach out and coordinate this Zoom call for you. You can also read about how we [field this request](#).

Interview Process FAQs

► [How to request for a reasonable accommodation](#)

► [I've started the interview process at GitLab, but haven't heard back from anyone recently. What do I do?](#)

► [Can I have the hiring team's email addresses so I can send them a note?](#)

► [Can I interview for multiple roles at the same time?](#)

► I've been rejected, when can I reapply?

► I already passed the technical interview, will I need to repeat that stage if I reapply?

Inclusive interviewing

The GitLab team understands the importance of inclusive interviewing, and we strive to ensure our hiring team is well versed in every aspect of diversity, inclusion, and cultural competence. A positive and comfortable candidate experience is our priority.

How we conduct remote interviews on a global scale

References

How references are conducted

References will be collected towards the end of the interview stage and they must be checked before or as an offer is made. The Hiring Manager or hiring team will contact your references. These reference checks will be performed in accordance with the applicable law of the jurisdiction. Where applicable, a reference check can also be used in the final decision for making an offer. The reference check is not the sole factor for a decision to hire or not hire an individual. However, in conjunction with the interview scores and the interview team feedback, all of these factors go into the hiring decision.

Three references will be requested and at least one needs to be a past manager. If you have only had 1 manager, and it is at your current company, it is okay to skip the manager reference (though at least two total references will still be required).

Offer & Background Screening

Depending on your location, a [background screen](#) will be initiated at the same time as references or once an offer has been extended.

Where does GitLab hire people?

GitLab is a fully remote, global workforce with team members in over 50 countries. Diversity, Inclusion & Belonging is one of our [core values](#) and our global footprint is one of the many ways this shows up in our workforce. We have employment infrastructure in the [following countries](#) that supports GitLab's global footprint.

Please refer to a specific job listing to see if the position is hiring in the country where you are located. You check our [handbook](#) for more in-depth information

What's it like to work at GitLab?

Our [mission](#) makes it clear that we believe in a world where everyone can contribute. We make that possible at GitLab by [running our operations on our product](#) and staying aligned with our [values](#).
